

Nawab Alam

COMPUTER SCIENCE ENGINEER

OBJECTIVE

To obtain an internship and job for a software development role in an organization where my skills are nurtured, and my passion is utilized.

PROJECTS AND EXPERIENCE

TEXT SUMMARIZER FOR NEWS AGGREGATION PLATFORM

Nominated for project of the year in Manipal University Jaipur

Developed a python-based application that summarizes news articles while preserving important information.
Extended the application to contain news categories and search options for users to filter news of their interest
Implemented quality control of news articles that can be adjusted using a seek-bar.

Python . Flask . Steamlit . Google News RSS Api . Newspaper 3k

BND MOTORSPORT

Have been an active member of the core team in BND motorsports and an integral part of the organizing team for various national level motor sporting events under FMSCI (Federation of Motor Sports Clubs of India).

I am associated with BND Motorsport for more than 3 years and have managed responsibilities across various parallels of the complete event. Some of which are listed below

Key Responsibilities

- Create and manage BND motorsports live results portal
- Manage logistical support for the team
- Manage registration team for a seamless driver experience. The registration team is responsible for making entries, assigning race numbers, assigning car numbers, fee collection, license and other data verification

Currently working on BND motorsport website which brings together registration, results, gallery, admin login, race control and various other dashboards.
